Introduction

Refreshments were enjoyed prior to the meeting (courtesy of Hoosier Energy) while brief status updates were given regarding the scope of the TTK 319 Grant project.

TTK "Ag Technology" Field Day Planning

. TTK Field Day Planning

This was planned to be a 'short and sweet' meeting with the main purpose of solidifying details for an upcoming TTK Field Day revolving around technology in agriculture, a popular topic among local producers and landowners.

The Watershed Coordinator had reached out to some speakers to check availability. Jim Love of Beck's Hybrids was available and happy to demonstrate the capabilities of his drones (UAVs) for no cost. Also available was David Wilson, of Farm Server (a branch of Beck's Hybrids that specializes in technology applications).

At the meeting, it was decided to have the field day on Wednesday, April 1st in the morning only to allow local farmers more time to get in the fields. Paul and Jack Gettinger suggested that the field day could be held at the historic Merom Conference Center, rain or shine. Lunch would be available, ample seating, and an optional historic tour afterwards.

With all details efficiently nailed down, the meeting concluded.

Next Meeting Date

The next meeting will take place on **Tuesday, May 12th, 2015 at 6:30pm**
Meetings are held in the Hoosier Energy Environmental Education Center, south of the Turtle Creek Reservoir, west of Sullivan, IN.
